

Gender Equality Plan at DIPF

The Governing Board of the DIPF | Leibniz-Institute for Research and Information in Education, together with all employees, is committed to actively promote gender equality through targeted measures and equal treatment in practice. The implementation of equal opportunities is regarded as a guiding principle. Measures for the implementation of equal opportunities are laid down in the DIPF Gender Equality Plan.

The current version was drawn up together with the elected Equal Opportunities Officers at the DIPF. It includes an analysis of the personnel structure at the institute and the identification of problem areas for the equality of female and male employees. From this, goals are derived and measures are formulated to achieve these goals.
